GENERAL COMMITTEE MEETINGS for the Year,—March 21st; June 13th; October 3rd and December 19th at Twelve o'clock.

HOUSE COMMITTEE MEETINGS—Second Thursday of each month, at Twelve o'clock, excepting those months in which the General Committee meet, when the meeting of the House Committee takes place on the same day, at 11 o'clock.

SIXTH ANNUAL REPORT
OF THE
Committee of Visitors,
OF THE
GLAMORGAN COUNTY ASYLUM,
To Her Majesty's Justices of the Peace,
ASSEMBLED IN QUARTER SESSIONS,
To be held at Cardiff, on Tuesday, 3rd January, 1871.

IN compliance with the provisions of Act 16 & 17 Vict., cap. 97, sec. 62, the Committee of the Glamorganshire Lunatic Asylum, have now to lay before you the following Report :—

The numbers on the books of the Asylum this day are 214 males, 194 females,—total 408; against 197 males, 163 females,—total 361, at the corresponding period of last year.

The admissions have been 111 (46·65) as against 83 last year; the discharges 64 (30·34) as against 45; and the deaths 31, as against 37.

The decrease in admissions which we noticed in our report last year no longer exists; the present year has on the other hand witnessed a remarkably sudden increase in the demand on the resources of the Asylum, especially on the female side, where the beds have filled so rapidly that out of the 210 which we have at our disposal (including the 40 new ones) there are now but 11 unoccupied; and, the construction of the Asylum is such as entirely to prevent the appropriation of any portion of the male department to the use of female patients.

The Committee have had under their consideration DR. YELLOWLEES' recommendation of an enlargement; and without altogether committing themselves to his views on the question of the limits which should be put to the extension of such Institutions in general, they are decidedly of opinion that it is expedient to adjust the accommodation of this Asylum, as between the numbers of male and female patients, by an addition of about 40 beds to the female department.

It will not be long before this extension will be absolutely required, and when effected, it will bring the accommodation of the buildings up to the full capacity of the superintendence, supply of water, gas, cooking, and general arrangements provided by the limits of this Institution. It is obvious that the cost per head of the patients will be diminished in proportion to the greater numbers brought within the compass of the general charges; on grounds of economy, therefore, as well as in view of the gradually increasing requirements of the County, they recommend the Court of Quarter Sessions to empower the Committee of Visitors to proceed with the erection of the further extension, so strongly urged by DR. YELLOWLEES in his last quarterly report.

The farm cottage is now occupied, and affords convenient accommodation for five working patients of a quiet class.

The whole of the buildings are in good repair. It has been found necessary to build a wall round a portion of the land, at a cost of £182, to complete in a fitting manner the enclosure of the Asylum grounds.

The recent addition to the females' ward has now been occupied, and works well. The new building, for males, is almost completed. It promises to afford all that can be required for the care and comfort of its inmates.

The sanitary condition of the Institution continues to be good.

The Commissioners in Lunacy have made their annual visit, and report favourably of the condition of the Asylum.

A further reduction of 6d. per week for maintenance has been made during the year. It now stands at 9s. 6d.

The Committee continue to have the most perfect confidence in the professional skill and untiring care of the Medical Superintendent, DR. YELLOWLEES; his Assistant, DR. PRINGLE, the Chaplain, and other Officers ably and cheerfully co-operate with him in promoting the comforts of the patients, and the general well-being of the Institution.

HENRY LYNCH BLOSSE,

Chairman.

*Glamorgan County Lunatic Asylum,
December 22nd, 1870.*

R E P O R T
OF THE
COMMISSIONERS IN LUNACY.

Glamorgan County Asylum,
8th February, 1870.

SINCE our Colleagues' visit in May last, 32 men and 25 women have been admitted, 11 men and 14 women have been discharged, and 19 men and 9 women have died.

Of the discharged patients, 10 males and 9 females were recovered. The deaths, although 3 of them were sudden, were all from ordinary causes. One of the 3 sudden deaths was caused by heart disease, the other two by epilepsy. Inquests were held in each of these cases.

The numbers to-day, 197 men and 165 women, are three in excess of those found here at the last visit, and nominally there are only three vacancies, all in the women's division. It is probable, however, that room may yet be found for a few more patients without much over-crowding.

The additions now making to the Laundry department are already roofed in, and will probably be finished in the course of next summer. The new buildings in connection with the workshops are also advancing rapidly, but they are in a less forward state. The additional accommodation which will thus be obtained, will be 120 beds on the male side, and 35 in the women's division.

The usual system as regards the useful occupation of the patients, has been followed during the past year, and of the men—of whom 70 work on the land, 22 in the workshops, and 58 in the wards—150 in all are employed. About 120 women are engaged in the laundry, the kitchen, and in needle and house work.

Last Sunday 116 men and 70 women attended Divine Service in the Chapel. We were in the hall at dinner time to-day, and can speak in terms of high praise of the quality of the food, the excellent manner in which it was served, and the great order and decorum which prevailed amongst the patients. Grace was very well sung, before and after the meal, to an accompaniment on the Harmonium, played by one of the men. Since the last visit, the decoration of the hall has been completed. The result, which is most successful, has, we hear, been obtained at a very moderate cost. The usual associated amusements still take place in this room, and last night a concert was given by a choir of fifty voices.

We found the Asylum throughout in the best order. The rooms presented a remarkably home-like and cheerful appearance, and we noticed everywhere that attention was given to supply and encourage the use of those various matters of ordinary domestic occupation which experience has shown to have so great an influence in promoting the recovery of the insane. The patients generally were remarkably free from excitement, and the clothing in both divisions of good quality and in excellent order.

As we passed through No. 4 male ward, a man of very dangerous and impulsive character was, in accordance with the daily practice, in seclusion; the door was unlocked on our arrival. This patient, who some time since made a murderous attack upon the night attendant, is not taken to the dinner in the hall, and as during the meal the ward in which he lives is left with one attendant only, it is thought necessary for the safety of others thus for a short time daily, to separate him from the rest; on the return of the other attendants to the ward, the door of his room is at once unlocked.

This is the only patient in the Asylum who has been secluded since the last visit, and the only instance of restraint has been when a male patient wore gloves at night on 19 occasions, to prevent him from destroying his bedding.

We have suggested that No. 4 male ward should never be left with less than two attendants. We have also recommended that ordinary light wire guards should be provided for the ward fires, which at present are entirely without protection.

We are sorry to find that owing to a deficiency in the water supply, it is still found necessary to bathe two patients in the same water.

One of the male patients having complained to us that he had been roughly treated by an attendant, we have had him before us, and in other ways endeavoured to ascertain if there was any truth in the accusation, but we have come to the conclusion that the complaint is without any real foundation.

In accordance with the provisions of the 110th section of the 8 & 9 Vic., cap. 100, we have made enquiries as to the visitation and management, and find that in addition to the quarterly visitation of the General Committee, and the monthly meetings of the House Committee, four of which fall upon the same days as those of the General Committee, a rota providing for the attendance of three Justices in each month is arranged yearly. These extra visits, which are made without notice, are most valuable. Frequent and unexpected visitation by the Justices, affording patients the opportunity of personally appealing to them, is, in our opinion, a most valuable aid to their comfort and well-being.

We are glad, in conclusion, to have to report most favourably of the general condition and management of the Asylum, which reflects great credit on DR. YELLOWLEES, as Superintendent.

W. G. CAMPBELL, } *Commissioners*
JOHN D. CLEATON, } *in Lunacy.*

ANNUAL REPORT
OF THE
MEDICAL SUPERINTENDENT.

GENTLEMEN,

I beg to submit my Report for the year 1870, with the usual Statistical and Financial Details.

The changes during the year have been as follows :—

	Males.	Females.	Total.
On 1st January, 1870, the Asylum contained.....	198	163	361
And there have been admitted during the year.....	47	67	114
So that the total number under treatment has been	245	230	475
Of this number, there have been Discharged	15	21	36
,, there have Died	18	15	33
And there remained on 31st December, 1870	212	194	406
	245	230	475
The net Increase during 1870, has thus been.....	14	31	45

The number of *Admissions* is 29 more than last year, and greater than that of any previous year save one. This is the more remarkable, because the increase has been entirely in the female admissions, which were 67 this year, and only 32 last year. I cannot pretend to explain this : it only shews how impossible it is to estimate beforehand, even for a single year, the number of cases which shall require Asylum treatment in a county whose population is so various in character and is increasing so rapidly.

The *Discharges* include only 25 *Recoveries*. This result compares unfavourably with last year, and is due to the hopeless character of many of the new cases, from which, of course, the recoveries are chiefly drawn. Of the 114 new cases received during the year, scarcely one third presented reasonable hope of recovery.

Ten patients were discharged as *Relieved*, and were handed over to the care of their friends, having been so far restored that residence in the Asylum was no longer absolutely necessary, nor likely to be of any further benefit. The discharge of such cases is never refused when the condition of the patient and the circumstances of his home seem to warrant it. Unfortunately the position of the friends, or their indifference, often prohibits the granting of such discharges, or ensures their failure when granted ; and frequently, too, it happens that a patient who is orderly and manageable here, becomes just the reverse when freed from the moral restraint of the Asylum ; but notwithstanding these drawbacks, I regret that discharges of this class are not more numerous.

The *Deaths* were 33 in number, being 5 fewer than last year, and in the proportion of nearly 7 per cent. to the total number under treatment.

Inquests were held on two cases of General Paralysis. In the one case death resulted from the passing of food into the windpipe in the act of vomiting. In the other, death was caused by rupture of the bowel, the accidental result of a kick from a fellow patient—who was so insane that he neither understood what he had done nor appreciated the consequences.

The general health of the Establishment has been good throughout the year. There were one or two isolated cases of Typhoid Fever and of Measles, but the Infirmary has been as usual occupied, not by cases of ordinary bodily sickness, but by patients in the last stages of Brain disease.

The delay in completing the new Buildings has caused, and on the male side still causes, great inconvenience and overcrowding, but the female extension is now occupied, indeed almost filled, and the new male ward will very soon be ready for occupation.

There will then be ample accommodation for men, but there are now only 11 spare beds on the female side, whereas the female increase during the past year was 31. Your attention has already been called to this subject in my last Quarterly Report, and the necessary steps have been taken for obtaining, in the most suitable manner, additional female accommodation.

There is nothing, either as regards Medical Treatment or general management, which requires special notice here. The weekly charge which was lowered at Midsummer, can probably ere long be further reduced, as the Establishment charges are spread over a larger number of Patients.

I am glad to acknowledge the most valuable assistance which I receive from Dr. Pringle, and to testify to the efficient and satisfactory manner in which the duties of the other officers are discharged.

It is a pleasant duty to express, at the close of another year, how greatly I feel myself strengthened amid many anxious duties, by the assurance of your support, and by the confidence you have at all times placed in me.

I have the honour to be,

Gentlemen,

Your obedient Servant,

DAVID YELLOWLEES.

R E P O R T
OF THE
C H A P L A I N .

GLAMORGAN COUNTY ASYLUM,

BRIDGEND, *Jan. 9th, 1871.*

GENTLEMEN,

At your first meeting in the New Year, in accordance with established custom, I beg to submit my Annual Report. No events calling for special notice have occurred in my department during the past year.

The usual course of Religious Services has been followed with but little deviation from the practice of former years. The only novelty introduced was the substitution of an evening for an afternoon service during the summer months. This change seemed to give general satisfaction, and in our opinion answered so well that we may in all probability be induced to adopt it again.

All the other duties of my office—such as visiting the wards and attending to the sick—have been performed in the usual manner.

We have had the Holy Communion as in former years. The greatest care has to be used in admitting patients to this Holy Ordinance. The behaviour of those who have from time to time attended it, has been characterised by strict decorum and apparent devotion, with one exception, which occurred on Easter-Day. A female patient, of a religious turn of mind, who had been a regular communicant, left the church suddenly during the administration of the Holy Communion under the impulse of an uncontrollable awe. Since that time her behaviour in the wards has been exemplary, and devout during Divine Service, but she has not expressed any desire to resume her place among the communicants.

Some of my clerical friends, whom I meet, look at me with a certain amount of astonishment when I tell them that the behaviour of my congregation is much the same as that of other people, yet so it is; many of the patients take part in the service by making the Responses in an audible voice, and joining heartily in the singing. To encourage them in this, and to make the singing as congregational as possible, care is taken to use chants and tunes which are well known to the majority of the people.

The winter nights' entertainments have been varied this season by the occasional exhibition of a Magic Lantern, and the delivery of popular lectures by Dr. Yellowlees.

In my Report last year I took the liberty of making an appeal on behalf of our Library, and it is now my pleasing duty to tender our thanks to Major Picton Turbervill for the books which he kindly sent to us in answer to that appeal. I need not add that further donations of books suitable for our Library will be thankfully received.

My work, which is not without its difficulties, has been rendered comparatively easy by the kind assistance and operation of the Medical Superintendent and Dr. Pringle, whom I would again tender my sincere thanks.

I have the honour to be,

Gentlemen,

Your obedient Servant,

CHARLES JONES, B.D.,

Chaplain.

To the Chairman and
Committee of Visitors.

STATISTICAL TABLES.
